LMC 2700 E TwitterBot
Group 18
Allen Santmier, Erika Kaczynski, Rose Rosado

The purpose of our bot is to tweet out popular movies and interact with other Twitter users about movies. It tweets out the most popular movies in Twitter discussions every hour and responds to @mentions with its favorite movie. When it finds a popular movie to tweet about, it also looks up that movie's IMDb rating and adds that to the post.

Our bot uses the standard Twitter API to respond to mentions and tweet updates. IMDb ratings are accessed by using the external OMBd API in combination with node-fetch.

The bot tweeting about a popular movie.

The bot responding to a mention.
